"The California will be the first bat-tleship of any navy in the world to be propelled by electricity," he said.
"Prophecy is always risky, but it is hardly too much to say that the installation of the electric drive upon the California ushers in a new epoch n navigation just as far-reaching and mportant as that in which steam suc eeded sail-power.
"Due to the installation of the electric drive, the California will have a cruising radius about 50 per cent

greater than her sister ships at cruising speed. The combination of the electric drive and oil fuel will enable her—at ten knots speed—the speed always calculated by the navy's ex-perts for endurance—to steam for nine days longer than a coal-burning Dreadnought, and during that time she can cruise more than 1,150 miles "The California is coming into our

navy at the time of the passing of oil as fuel. This Dreadnought will be an oil-burner, and a second coinci-dence lies in the fact that a good part of the oil fuel for future use by the navy doubtless will come from the rich oil fields of California. Part of the oil fields reserved by the govern-ment for navy use are in California, and the courts have recently decided that the title of the government to these reserved oil fields is a valid

"As the navy will own its own oil lands and will in the long run pro-duce, transport, refine and store its own oil, in order that the Navy Department may at all times be assured of an adequate supply at a reasonable cost, and as California, out of her abundance, will supply a great part of this fuel. it is indeed fitting and proper that a great American war vessel should bear the name of this State, whose resources are so needful to the success of our navy."

SHOOTING OF PRINCE VEILED IN MYSTERY

THE PRINCE OF WALES.

The report that the Prince of Wales, who is attached to the British general staff at the front, had been shot in the arm, as a result of the jealous rage of a French corporal named Huguet, who believed that the prince had been paying too frequent attention to his wife, is shrouded in myetery.

It is said that Huguet's wife, an attractive attendant at an inn frequented by the British staff officers, had been passing as an unmarried woman, and that several of the Englishmen had been making love to her.

ing love to her.

The corporal husband returned from the trenches one afternoon about 5 o'clock and entered the inn just as the British officers, among them the young prince, were taking tea. To the corporal it looked as if his wife was paying particular attention to the prince. In his blind rage he shot the prince in the arm and then turned the weapon on, himself, according to the story.
